Proposal for a Pan-African Economic Enforcement Alliance

To Ensure Fair Pricing and Equitable Wealth Distribution Across Africa

By Jordan Brodie

Student, Botswana International University of Science and Technology (BIUST)

August 8, 2025

Executive Summary

Africa's immense wealth of natural resources and vibrant labor force remain undervalued on the global market due to fragmented trade policies, weak currency positions, and external pressures. This results in significant economic injustice, perpetuating poverty despite abundant resources.

This proposal calls for a **Pan-African Economic Enforcement Alliance (PAEEA)** — a coordinated framework among the African Union, AfCFTA, African Development Bank, Pan-African Parliament, and Regional Economic Communities to:

- Set and enforce minimum export pricing and labor wage standards continent-wide
- Develop transparent sovereign wealth fund models and direct citizen dividend mechanisms
- Promote intra-African value addition and industrialization
- Ensure unified sanctions and trade policies to prevent undercutting and exploitation

Background and Problem Statement

Africa holds approximately 30% of the world's mineral reserves, 60% of arable land, and has the youngest and fastest-growing population globally. Yet, millions live in poverty because:

- African commodities are sold at prices far below global market values
- Currency exchange mechanisms favor the US dollar, euro, and yuan, weakening African purchasing power
- Foreign corporations capture disproportionate profits, while African workers and governments receive minimal returns
- Lack of unified policies among African countries allows foreign companies to exploit regional disparities

Vision and Objectives

We propose that Africa:

1. Unites economically to set continent-wide minimum export prices for critical resources and minimum labor wages aligned with global standards

2. Establishes or strengthens sovereign wealth funds at national and pan-African levels for transparent management and equitable distribution of resource revenues
3. Incentivizes local processing and manufacturing to add value within Africa rather than exporting raw materials
4. Coordinates enforcement mechanisms across the African Union and Regional Economic Communities to prevent price undercutting and maintain a strong united front in trade negotiations

Proposed Actions

1. **Formation of the Pan-African Economic Enforcement Alliance (PAEEA):**
    - Under AU leadership, create a task force with representatives from AfCFTA, AfDB, Pan-African Parliament, and RECs
    - Define legal frameworks and policies for minimum pricing and labor standards
    - Develop shared monitoring and enforcement mechanisms
2. **Sovereign Wealth Fund Development and Wealth Redistribution:**
    - Share best practices from Norway's Oil Fund and Alaska Permanent Fund
    - Ensure funds are managed transparently to prevent concentration of wealth among oligarchs or corporations
    - Implement mechanisms for direct wealth distribution to citizens, such as regular dividends or investment in public services like education and healthcare
    - Promote legal and policy frameworks that limit undue corporate influence over natural resource revenues
3. **Intra-African Industrialization Incentives:**
    - Provide financing and policy support for value addition industries
    - Facilitate technology transfer and skills development
4. **Unified Trade Policy and Sanctions:**
    - Establish continental policies to impose sanctions on entities violating pricing agreements
    - Coordinate customs and tariffs to support enforcement

Benefits

- Increased fair revenue flows to African governments and citizens
- Reduced poverty through equitable wealth distribution
- Prevention of wealth concentration and oligarchic control over natural resources
- Stronger negotiating power in global trade
- Sustainable industrial and economic development
- Enhanced political and economic unity across Africa

Call to Leadership

This proposal invites African leaders and institutions to take bold collective action to reclaim Africa's rightful economic power. The time is now to move beyond fragmented policies and build a unified, prosperous future for all Africans.

Conclusion

With shared vision and cooperation, Africa can transform its natural wealth into lasting prosperity and justice. I urge the AU, AfCFTA, AfDB, Pan-African Parliament, and Regional Economic Communities to lead this historic initiative.
